The Importance of the Vault

THE BURIAL VAULT FIRST LINE OF PROTECTION

The weight of the earth and heavy equipment used to dig graves far exceeds what an unprotected casket can withstand. A burial vault made of specially formulated reinforced concrete is designed to support these elements and more. Concrete becomes stronger when placed in the ground: so a vault buried years ago could actually be stronger today. Our water resistant, coated and lined vaults are made to place protection from impact and moisture between the earth and the casket. Doric vaults are made to exceed cemetery requirements for strength and rigidity.

THE ANATOMY OF A DORIC VAULT

1. Decorative carapace for added strength that features personalized nameplate & emblem.
2. Steel reinforced cover for added strength.
3. Inner liner of touch ABS Fiberlon®, Lustra-Tech® or Durapreme® bonded to minimum 5000 psi reinforced concrete base and cover
4. Doric's Integra-Seal® forms an extra barrier from moisture after the vault is sealed
5. Exterior of vault has a hand-applied water resistant coating

DORIC
ILLUSTRATION®

The Importance of the Vault

When the burial vault is set at the cemetery it often looks like this. At the conclusion of services the casket is placed in the vault; the vault is sealed above ground and carefully lowered into the grave.

Premium Vaults

Superior Quality Burial Vaults

Bronze™

Triple wall protection combines the durability of reinforced concrete with an ABS Fiberlon® plastic liner for extra strength. Cover carapace is also covered in gleaming bronze for added beauty. Decedent nameplate and appropriate decorative emblem. Bar Handles and subtle elegance. Textured exterior highlighted with two-tone paint to complement the casket selection. Backed by the DORIC full 100 year warranty.

Lydian®

Triple wall protection combines the durability of reinforced concrete with an ABS Fiberlon® plastic liner for added protection and beauty of a copper inner liner for extra strength. Cover carapace is also covered in rich copper for added beauty. Decedent nameplate and appropriate decorative emblem. Bar handles add subtle elegance. Textured exterior highlighted with two-tone paint to complement the casket selection. Backed by the DORIC full 100 year warranty.

Athenian®

Triple wall protection combines the durability of reinforced concrete with an ABS Fiberlon® plastic liner for added protection and the beauty of a stainless steel inner liner for extra strength. Cover carapace is also covered in brilliant stainless steel for added beauty. Decedent nameplate and appropriate decorative emblem. Bar handles add subtle elegance. Textured exterior highlighted with two-tone paint to complement the casket selection. Backed by the DORIC full 100 year warranty.

Vinyl Emblems

We have a wide selection of vinyl emblems. Our vinyl emblems can be placed on urns, urn vaults and our DORIC Vaults (Bronze, Lydian, Athenian and Patrician.)

Manufacturing

Superior Quality Burial Vaults

C&M Concrete is independently inspected by the National Concrete Burial Vault Association. These field inspections and their certification assure you of receiving a product that has been made to exacting standards.

Here is a step-by-step look at how a burial vault is manufactured.

Doric vaults feature an exclusive ribbed inner lining formed to exacting standards at our manufacturing facility in Kerrville, TX.

Burial vault liner is prepared to receive its outer casing of concrete. A layer of Integra-Bond® assures proper lamination.

Integra-Seal® butyl sealing compound is laid into the seal groove on the cover of the vault.

Concrete is poured into the base form and vibrated to insure all air pockets have been removed. The process is repeated for the cover to complete the vault.

After the concrete begins to set, the forms are removed. The product is smoothed and stored for final curing and finishing.

Manufacturing

Superior Quality Burial Vaults

The vault begins the controlled 28-day process of curing to a load bearing strength of 5000 pounds per square foot. It will continue to cure after it is placed in the grave.

A water resistant exterior finish is applied to the outside of the vault. A hand applied highlighting completes many Doric vaults.

Personalized nameplate and emblem are applied and the vault is prepared for delivery to the cemetery on the day of the funeral.

Construction Components

Plastic Inner Liners

DORIC FIBERLON® plastic is formed with strengthening ribs for use as a lining in the DORIC PHOENIX®. It is

a super high impact enhanced plastic. It evidences great impact and compressive strength. Consumers find applications of plastics such as FIBERLON® in NFL football helmets, telephone set casings and snowmobile or waverunner components. The bronze, copper and stainless steel inner liners of the DORIC BRONZE®, LYDIAN® and ATHENIAN® are chemically bonded to FIBERLON® for additional strength.

LUSTRA-TECH® used on the DORIC PATRICIAN® is a high-gloss, high impact plastic formulated to enhance

impact and tensile strength. LUSTRA-TECH® gives the PATRICIAN® a classic look of marble. Plastic similar to LUSTRA-TECH® are used in luggage and construction.

DURAPREME® is used to form the linings of the DORIC TIARA® and TITAN®. It is a tough high impact plastic. When formed into a lining with strengthening ribs on all sides, it exhibits tough flexural strength. Plastics like DURAPREME® are found in consumer items such as tableware and appliance linings.

DORIC Ribbed Liners

DORIC plastic liners used on the PATRICIAN®, PHOENIX®, TIARA® and TITAN® have strengthening ribs in their design, increasing both impact and compressive strength.

Integra-Bond™ All DORIC burial vaults use a special bonding system. This adhesive bonds the plastic inner liner to the concrete wall and cover.

Integra-Seal™ All DORIC burial vaults use a butyl compound in their seal groove that merges base and cover to form a single sealed unit. This butyl compound is highly resistant to extreme fluctuations in temperature.
